No it was a volume issue. That's why we set up the call in. Hopefully they've all been reached but let me know if some are still complaining today.

Not sure if this was followed up on. I'm hearing on the ground that there have been a lot of people calling into Rich's line and getting now response. According to a few since Thursday. Does his voicemail say to call someone else? May want to see if he can change it?

Hello,

I'm with CNN, and we're seeking EPA comment about the mine spill in Colorado. I've got a few questions about how it was triggered and the water testing process. Please give me a call at 404-304-4522.

Regards,
Eli Watkins
